<p>OFFICIAL NOTICE TO SHIPPERS, FORWARDERS, CONSIGNEES AND CARRIERS OF TRANSPORT</p>
--

The Director General of the Congolese Shippers' Council hereby informs all shippers, forwarders, consignees, carriers and other organizations and structures taking part in the international trade of the launch of the application of the Single Window of Cross-border Operations ('Guichet Unique des Opérations Transfrontalières': GUOT).

As a result, the ECTN system has been improved by interfacing the two applications in order to make the clearance through customs easier.

The shippers, forwarders, consignees, carriers of transport, organizations and structures taking part in international trade need to communicate the transport file number (TI), which consists of 'TI-XXX/X' e.g. TI-110/1, to their partners in the port of loading in order to make sure the ECTN can be created.

In light of a strict compliance to the measures in present official notice, the Congolese Shippers' Council requests the general agent to take the necessary measures to ensure it is broadly distributed to all agents and subagents in all ports of loading.

Should you require further information, please contact the Direction General of the Congolese Shippers' Council.
